Communication Technology Within Your Reach

The difference for horizontal movement.

ConferenzCall

The multi-party teleconferencing system

When travelling is inconvenient or too costly for a group or an organisation to assemble and communicate, **ConferenzCall** makes communication possible and simple for you.

Applications

ConferenzCall can be used in countless situations. You can organise or conduct the following at anytime from anywhere. Here are just a few examples:

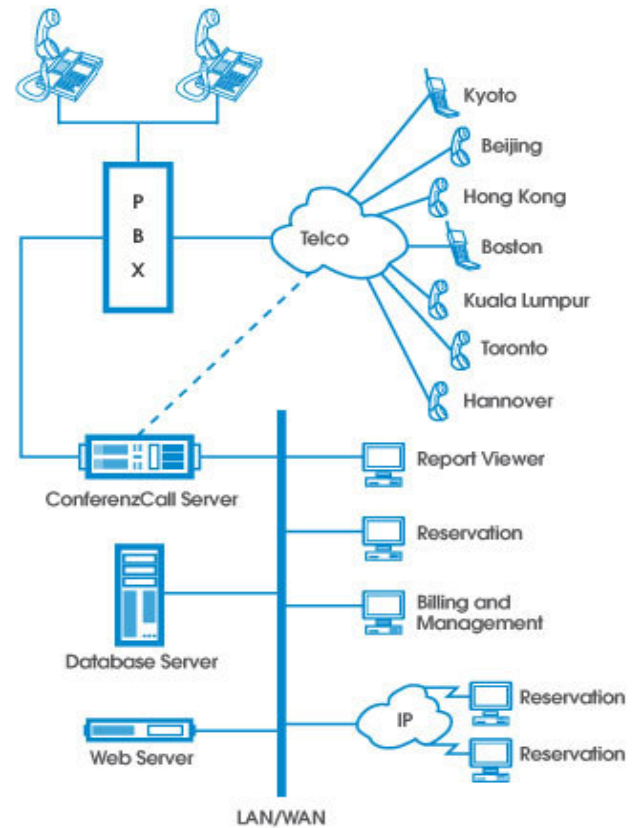

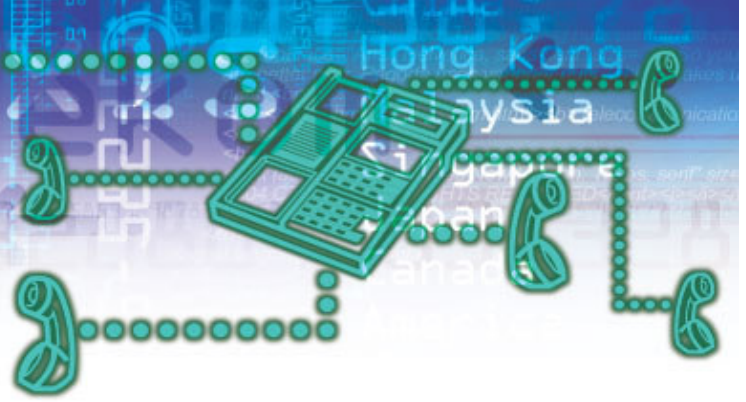

- Management meetings
- Sales and marketing briefings
- Counselling
- Crisis management
- Brainstorming
- Training and distance learning
- Press conferences
- Product launches
- Product development
- Ad hoc meetings or discussions
- Mergers and acquisitions
- Special events

and many more...

ConferenzCall enables you to professionally organise and conduct conference calls for other businesses. It is developed for telecommunications companies and bureau service providers.

ConferenzCall comes with many features that benefit you as a teleconferencing operator, and your clients who seek teleconferencing services.

ConferenzCall is the most efficient, effective and fast way for groups of people to communicate in real-time while overcoming geographical and time barriers.
